## MANTSINEN chooses LINDER INDUSTRIAL MACHINERY as partner

Finnish MANTSINEN Group Ltd Oy is pleased to announce that it will start a strategic collaboration with Florida based company Linder Industrial Machinery for the distribution of the full range of Mantsinen hydraulic cranes. The agreement also covers the distribution of spare parts and the service on existing and new machines. Linder Industrial Machinery operates currently in Florida, Georgia and North and South Carolina.

For 60 years, Linder Industrial Machinery has sold only the most reliable and technologically advanced equipment in the Mid-Atlantic and Southeast US. Linder Industrial Machinery is already a dealer of KOMATSU, WIRTGEN and KONECRANES SMV, among others.

John Coughlin, President at Linder Industrial Machinery comments: "With this addition of Material Handlers to our product line, we look forward to supporting the bulk material handling community by improving the efficiency, speed and safety of material handling to new levels."

Mantsinen 70, 90, 95, 120, 160 and 200 material handlers feature key technology that will handle more capacity with less energy. Machine reach, mobility, safety, efficiency and cost effectiveness are the key features of Mantsinen material handlers. Mantsinen Material Handlers typically double production rates when compared to traditional cable cranes in bulk material handling applications. Mantsinen machine operators work in a comfortable climate controlled cabin with complete visibility to loading targets.

Speaking on behalf of Mantsinen Group, Area Sales Director Asko Kinnunen commented: "Mantsinen is keen to start it's partnership with Linder. Their commitment to serve customers and our common values of providing the most reliable and innovative machinery is a perfect combination".

The high quality, ergonomics and tailor-made solutions, typical for Mantsinen, together with the strong reputation and customer focus of Linder is the ideal combination for a long and successful partnership.
